

MECCANICHE VELOCI

Icon Podium

Meccaniche Veloci is introducing a new version of the Icon collection: the Podium at the Baselworld 2019. The watch has four distinctive carbon-fibre dials. The lower two dials are skeletonised, allowing the technical details of the Manufacture calibre MV8802 – a movement designed in-house by Meccaniche Veloci and capable of simultaneously handling four time zones – to be admired. The unmistakable 49-millimetre piston-shaped case comes in natural titanium for the Podium model.

Here is a collection with some great technical appeal, as well as exceptional detailing. The passion for watchmaking technology and the eternal inspiration of the world of engines combined with the certified 100% Swiss Made parts find a new expression in this collection.

With a 49 mm diameter, the proportion of the watch is just perfect. Diameter, 49mm. Besides the regular time telling functions, other functions include 4 independent time zones, instantaneous date and stop-seconds. A graceful black leather strap completes the look.
